**Challenges and recommendation when doing children activities.**

1. Distance of schools is a bit far due to lack of motorbike in the orphanage for easy mobility purposes even when visiting the sponsored children in various schools and when conducting home visits for sponsored children. Having a motorbike will make movement easy even when taking children to hospital may be even when emergency circumstance.
2. Lack of Laptop and Printer makes us to spend money on cyber activities (typing, scanning, photocopying and internet services.) It will be good if in future we have those items for easy report writing and doing other necessary children’s activities.
